Overview

The Utah Department of Transportation (UDOT), "Electronic Bid System" (EBS) is a Windows Program for bid preparation and bid submission. Prime Bidders for a Utah Department of Transportation project will use this program to prepare and submit their bid. The Contractor EBS can be downloaded from the UDOT Website and installed on a PC or laptop.

Software

The Electronic Bid System (EBS) performs all arithmetic, automatically calculates price times quantity extensions, subtotals by project detail and totals the bid. The program will check for an incomplete bid (failure to bid all required items) and will not allow the contractor to bid more than one opposing alternate. For items that have fixed unit bid prices, the program will not allow the price to be edited.

(Internet Browser Disclaimer: This manual shows screens from Internet Explorer. This browser is not required; use your choice of browser. Some browsers may show these web pages differently than others.)

Project Items

After installation of the EBS module, EBS DBE Directory and EBS Subcontractor File, the Bidder may then go to the UDOT Website to download a project item data file for any project open for bid. The project item data file contains the items and quantities for bidding the project. The Bidder will then be able to download and open the project data file to prepare and submit a bid from their computer electronically or manually.

Certified DBE Contractors

Federally funded projects require a Disadvantaged Business Enterprise (DBE) Commitment be included with the bid and will have a DBE goal assigned to the project.

If you intend to sublet project items to a DBE, the software will assist you in the preparation of the required documentation to submit with your bid.

Bid Submission

The Electronic Bid System will create an encrypted bid file that will be transferred to a secure Internet connection. The bid may still be submitted by saving the bid data to an electronic device and printing the bid reports for a written signature. If the bid information submitted on the signed bid reports and the information on the electronic device do not agree, the signed bid reports are the binding version. If the bid information is also electronically submitted, the bid in the data repository is the legally binding version.

Install EBS Software

The UDOT Electronic Bid System (EBS) can be downloaded from the UDOT Construction Website and installed on your system's hard drive.

Steps to Download the EBS:

- 1) Establish a connection to the Internet using your browser.
- 2) Enter the following URL into your browser's Address Window:
<http://www.udot.utah.gov/> (see 2 screen shots below)

C:/EBS/

(This is the blank bid item file, not to be confused with completed bid package file which will contain contractor UDOT ID number and bid open date.)

(Close browser and go to desktop.)

Starting Electronic Bid System (EBS)

To run the EBS software, locate the icon by going to your desktop. The program has installed a new icon titled “UDOT EBS”. Double click.

Creating Contractor Profiles

When the application opens for the first time, the Contractor Profile window appears. The profile information must be entered before proceeding in the program.

Complete information in white boxes (see screen shot on next page).

When the 'Contractor Profile' Window is displayed, enter the UDOT Contractor ID Number in the new profile. This number is assigned by UDOT and must be obtained from UDOT and entered correctly into your profile. In order to process a bid, the Contractor ID Number in your profile must exactly match your Contractor ID and company name in UDOT's database.

If more than one profile has been entered, you may select the desired profile by clicking on "Profile" in the menu bar and then "Select Contractor".

Note: The Contractor ID Number must be obtained from UDOT and is unique to the company name. You must be consistent in the use of the company name. Company authorized signature is mandatory. If a firm is incorporated, State of Charter and officers (President, Secretary, and Treasurer) are required. Each time you submit a bid you can indicate an update to the UDOT database with the two following exceptions:

- (1) Contractor ID – must match the company ID already in the UDOT database.
- (2) Company Name – mandatory to contact UDOT for any change to company name. This process will produce a new Contractor ID.

Before leaving any screen "save" by going to "Project" in the menu bar and selecting from dropdown.

Unlimited Prequalification

Contractor Profile Overview

The Contractor Profile contains information identifying the bidding contractor and is required with each bid submitted.

The profile information needs to be entered once and can be modified at any time. Each time there is a download and install of an update to the EBS software, the Contractor Profile information is re-accessed from the data in the installation directory (unless the directory is manually deleted prior to the re-install of the software).

If you have multiple offices preparing bids, use only the company information for the main location which possesses the appropriate prequalification, if required for project to be bid.

Some contractors may be incorporated under different names and Federal Tax Ids, but may submit bids from the same central office. To accommodate this case, the contractor can add as many profiles as they require. Each profile will require a unique UDOT Contractor ID number.

If only one profile is defined to the program, it is automatically associated with all bids created on the system. If multiple profiles are defined to the program, the software will require that each bid be 'associated' with a profile. Contractor Profile associations are made either when the EBS software is started or prior to the load of project items. The Contractor Profile information is needed to print on all Bid Reports for bids submitted electronically or to an electronic device/printed/signed copy of the bid file.

Contractor Profile Information

To add, edit and view a Contractor Profile, click on the menu item **Profile**, and then select from the drop-down list.

Deleting Company Profiles

To delete a Contractor Profile, click on the menu item **Profile**, click **Edit**, select the profile you want to delete. Click, 'X' in tool bar, confirm deletion. Deleting the profile will also delete all projects associated with that profile.

Status of Work

Whenever a project has been advertised at \$3,000,000 or more, prequalification is required and the **“Status of Work Under Contract”** information must be reported by bidding contractors. “Status of Work Under Contract” form is not required if a contractor has pre-qualified as **“Unlimited”** by UDOT. The Status of Work Under Contract information can be updated at any time.

To add Status of Work Under Contract information, click on “Profile” in the menu bar. Choose desired item from dropdown. Click tab “Status of Work Under Contract”, Click insert row (or delete row). Enter information for **Description of Work, Contract Owner** and **\$ Amount Outstanding/Percent Complete**.

To delete an entry, highlight entry, click Delete Row.

The screenshot shows the 'UDOT Electronic Bid System: Program Version 5.09 - Goofer's Construction' window. The 'Contractor Information' sub-window is active, with the 'Status of Work Under Contract' tab selected. A yellow arrow points to the 'Delete Row' button. A 'Confirmation' dialog box is open, asking 'Delete Selected Row?' with 'Yes', 'No', and 'Cancel' options. The background table contains the following data:

Description of Contract	Client for whom Performed	State	Award Date	Probable Date of Completion	Contract Amount	% Complete	\$ Amount Outstanding
Bridge Overlay	UDOT	UT	04/12/2014	04/15/2015			\$1,200,000.00
Total of Outstanding Amount							\$1,200,000.00

Prequalification Information for Status of Work

The company Authorized Prequalification amount is needed on the Status of Work Report to bid a UDOT project estimated at \$3,000,000 or more. If company is “Unlimited”, check the box indicating Unlimited Prequalification. If not Unlimited, enter prequalification amount.

“Status of Work Under Contract” form will automatically associate to project bid.

Load DBE Directory

Load Subcontractors

C:/EBS/

Loading Projects to Bid

The first step in preparing a bid is to download a project item data file from UDOT's Project Explorer website. The project file contains all items and quantities for bidding the project. The project file is to be loaded only once unless an addendum is created that affects the project's item data file. If the project item data is changed, a new download is required for the project to include the changes. The project's item data file must contain and acknowledge the latest addenda to be considered a valid bid. Addenda acknowledgement icon is on the menu bar, "A".

Loading Projects from Web to EBS

Steps to load projects into EBS:

- 1) Go to Desktop and click UDOT EBS icon.
- 2) Click '**Project**', '**Load New Project**'.
- 3) To select project file to load, go to your c:\ebs\download. Scroll to the project, double click. **You can only load one project at a time.**
- 4) **Project bid items appear in the '*Project Item Bid Detail*'.** Enter bid item prices in the '**Unit Price**' column. The '**Extension Price**', '**Subtotals**' and '**Bid Total**' calculate automatically. Enter days bid for project completion according to project specifications.

NOTE: The project being loaded will automatically associate with the Contractor Profile selected when the EBS software was initially started. If only one Contractor Profile has been defined to the EBS software, all projects are associated with that profile. If more than one profile has been created and a different Contractor Profile is to be associated with the project to be loaded, select **Profile** from the menu bar, click **Select Contractor** from the drop-down menu, and then select the desired Contractor Profile.

Acknowledge Addenda

Steps to acknowledge addenda:

1. Select 'Project'
2. Select 'Project Addenda'.
3. Select, 'Add' for each issued addenda.
4. Insert initials, save and close

Project Addenda Overview

Addenda issued on a project must be acknowledged with submission of the bid. UDOT will notify bidders listed on the 'Plan Holders List' for all project addenda. In addition, UDOT will post all addenda to the 'UDOT Bid Opening Information/Project Explorer' website for the appropriate project. It is your responsibility to comply with the addenda and respond appropriately by acknowledging receipt of all project addenda in your bid. If the project bid item data is changed by addenda, a new project bid item file must be downloaded for your bid to include the changes. The project's item data file must contain the latest addenda to be considered a valid bid.

Move Overview

In some instances bid preparation may begin on one computer and the bid or portions of bid may need to be transferred to another computer for completion. In this case, the '**Move Project**', under "**Project**", in the menu feature would be used. This feature will move the entire encrypted project or portions to a selected target (via diskette, CD or electronic device). On the computer that is to continue the bid preparation, the 'Load New Project' under "**Project**" would be selected.

All bid documents or selected documents can be moved from PC to PC. Remember, the complete bid must end up on the one PC selected for submittal. This move feature makes it possible for one person to be working on the bid detail, while another is working on the DBE Commitment, Good Faith Effort, etc.

IMPORTANT: This feature will move parts or the entire project. More than one person cannot be moving the same function (i.e. Bid Detail, DBE Commitment, Good Faith Effort, etc.). The last person performing the **same** "Move" will overlay previous moves. All moved documents eventually need to reside on the PC submitting the bid.

Export/Import Bid Items

“Export Project to Spreadsheet” under “Project” in the menu bar, can be used by Contractor’s who use 3rd party software (i.e.; Bid2Win, HCSS, Hard Dollar, etc.) to export pricing information for their bid proposal. Contractor’s can also use this feature to create a simple spreadsheet and add formulas to determine the best unit prices for their bid proposal.

IMPORTANT: The original columns of the data exported to text must not be moved (i.e. – they must remain in the same sequence); and the file must be saved back to an ASCII text format for the import to be successful. Specifically, the sequence of columns A through R must not be moved (i.e. - their sequence must remain in the original sequence when the file was exported from EBS) and, except for column O, should not be edited. The unit prices are in column O and those can be edited. Formulas and labels may be added as desired at column S or beyond and beneath the final row of item information.

If using Excel, note the information is in tab-delimited ASCII format. If using Quattro-Pro, select ASCII text format when saving changes whether using “save” or “save as”.

After the prices are calculated, ***“Import Project from Spreadsheet”*** under “Project” in the menu bar can be used to import the unit prices back into the EBS.

DBE Commitment Overview

DBE Commitment - A *Disadvantaged Business Enterprise (DBE) Commitment* is required if a *DBE Goal* is assigned to the project. A DBE Commitment is required if a DBE subcontractor will be used to perform or supply a portion of the project items.

A DBE Commitment is not required if a Non-DBE subcontractor will be used to perform or supply a portion of the project items or if the 'DBE Goal' indicates 'N/A' (Non-federal aid Project).

The Good Faith Effort is the process used to document contact with DBE subcontractors in the preparation of your bid. A DBE subcontractor can only be added to the dropdown lists by the UDOT Office of Civil Rights.

If a DBE was contacted, you must include **'Work Group ID'**, **'Contact Method'**, **'Contact Date'**, and **'Contact Result'**. If the 'contact result' is **'Quote Received'** and you intend to use the quote in your bid continue to the 'DBE Commitment' icon.

Good Faith Effort

If a project has a Disadvantaged Business Enterprise (DBE) goal assigned, a DBE Commitment is required (i.e., when the **'Project DBE Goal'** contains a percentage. N/A would indicate no goal assigned.). However, if a DBE Commitment cannot be created or the required goal cannot be met, **'Good Faith Effort'** documentation must be provided to UDOT, Civil Rights documenting the reason for not meeting the DBE Goal. This is accomplished within the submitted bid.

Refer to the project's ***Supplemental Specification and Special Provisions, Appendix A***, for more information about Disadvantaged Business Enterprise commitment and 'Good Faith Effort' documentation requirements, specifically the ***'Suggested Actions and Required Documentation to Demonstrate Good Faith Efforts to Comply with DBE Requirements'*** section.

Within **72 hours** of bid opening, deliver printed copy to committed DBE for signature. Then fax copy to UDOT Civil Rights number listed on printed form.

Confirmation (Unofficial Low Bid Contractor Only)

The apparent low bidder on a project is required to submit to UDOT within three (3) working days after the bid opening, written confirmation for each DBE participating in the contract as documented in the Contractor's "DBE Commitment".

Steps for viewing and printing this confirmation form:

1. Open the **"DBE Commitment"** window and click on tab **"4. DBE Confirmation Form"**
2. Go to **"Project"** in the menu bar; print a confirmation form for each committed DBE subcontractor. After the committed DBE subcontractor signs the form, fax it to the fax number indicated on the bottom of the form, (Attention: UDOT Civil Rights Office).

Bid Submission

When your bid is prepared and ready to submit for bid opening, "save" and close "Project Item Bid Detail".

In the menu bar, select "Transmit Bid".

NOTE: ALL BIDS MUST BE RECEIVED PRIOR TO 2:00 pm OF BID OPENING DATE. (The accepted bid will be the last submission prior to 2.00 pm of bid open day.)

Print forms, then Transmit Bid.

Save.

Manual Bid Submission

Manual Bid Submission, consisting of a printed and signed copy of bid including an electronic device, diskette or CD, will be allowed only in emergency situations where the bid cannot be submitted over the Internet.

When a bid has been prepared and ready to be hand delivered to UDOT, print and sign a hard copy attaching the electronic device containing the bid. Follow previous instructions to print bid. Save bid to an electronic device. Place signed, hardcopy and electronic device in a sealed envelope which indicates company name and project number. Deliver to UDOT/Construction Office **prior** to the time scheduled for opening of bids.
